

Please leave wisconsin's no-call list as it is. My days are better spent not having to answer the numerous calls that could come to this house and no telemarketer would want to waste time calling here. I resent calls that come from these sources because they interrupt important things I am doing. We care for elderly people and they do not need to be answering unnecessary calls. Just getting up to answer a call is hard for them. They should not have to deal with telemarketers.
